

Blast/Coat Systems, Inc.

Coatings Inspection Equipment

Blast/Coat Systems is proud to announce the launch of coatings inspection equipment, the newest addition to our product lines!

Instruments and test kits are now available for measuring ambient conditions and surface temperature, measuring surface profile depth, assessing surface cleanliness, sampling and testing for soluble salt contamination, calculating and measuring wet film thickness, measuring coating thickness, adhesion testing, detecting pinholes and holidays in coatings and linings, and more.

From such well-known manufacturers such as **Defelsko**, **Testex** and others, instruments available include:

- ▶ **Adhesion Testers**
 - ▶ Hydraulic ▶ Air ▶ Mechanical
- ▶ **Air, Moisture & Temperature**
 - ▶ Dewpoint Meters ▶ Hygrometers/Psychrometers
 - ▶ Airflow ▶ Chart Recorders ▶ Surface Temperature
- ▶ **Coating Film Thickness Gauges**
 - ▶ Digital/Ultrasonic ▶ Mechanical/Magnetic
 - ▶ Destructive Gauges ▶ Powder Thickness
 - ▶ Wet Film ▶ Calibration Standards
- ▶ **Contamination Test Kits**
- ▶ **Hardness, Impact & Wear Testers**
- ▶ **Holiday Detectors/Film Flaws**
 - ▶ High Voltage ▶ Low Voltage
- ▶ **Pit Gauges**
- ▶ **Surface Profile Indicators**
- ▶ **And More!**
